

Argos Risk Announces Partnership with Credit Union Loan Source

Argos Risk and Credit Union Loan Source Partner to Bring Continuous Third-Party Risk Intelligence to Participating Credit Unions

MINNEAPOLIS – October 28, 2026 – Argos Risk, LLC, a leading provider of third-party risk intelligence solutions, today announced a strategic partnership with Credit Union Loan Source (CULS), a CUSO that provides indirect loan participation opportunities and smart solutions for credit unions.

Through the partnership, CULS will introduce Argos Risk's AR Surveillance™ platform to its participating credit unions, providing them access to continuous, multidimensional risk intelligence designed to help identify and evaluate meaningful changes involving the businesses they rely on.

The collaboration builds on a longstanding relationship between our two organizations. CULS has been utilizing the AR Surveillance platform for many years to support its own risk-management processes. This new partnership will extend the opportunity to its participating credit unions, helping them gain more timely insight into financial, cyber, legal, compliance, and reputational risk management.

AR Surveillance delivers continuous, multidimensional risk intelligence, bringing relevant business intelligence together in one easy-to-understand platform. The solution helps organizations recognize meaningful changes, prioritize relationships requiring attention, and make more informed risk decisions.

"Credit unions need timely and dependable information to make informed decisions and manage risk effectively," said Bill Moniz, President and CEO of Credit Union Loan Source. "Our experience with Argos Risk has demonstrated the value of continuous business-risk intelligence. Through our partnership, CULS can offer participating credit unions an additional resource that helps them identify meaningful changes and direct their attention in a timely and actionable manner."

"Credit Union Loan Source has been a valued Argos Risk subscriber for many years, and we are pleased to expand our relationship through this partnership," said Lori Frank, President and CEO of Argos Risk. "CULS understands the importance of combining responsible loan growth with

strong, ongoing oversight. Together, we are making it easier for participating credit unions to access timely intelligence and incorporate it into their risk-management processes.”

The partnership reflects both organizations’ commitment to helping credit unions strengthen oversight while managing and diversifying their indirect auto-loan portfolios.
